### **Amendments to the Specification**

Please amend paragraph [0019] as follows:

--[0019] The foregoing and/or other aspects of the present invention may also be achieved by providing a charging apparatus used with a mobile robot having a rechargeable battery and a contact terminal, the charging apparatus including a casing, a terminal mounting board disposed on the casing, a power ~~code~~ cord connectable to an external power source, a guide groove formed on the terminal mounting board, and a charging terminal. The charging terminal includes a body having a first support member to be inserted into the guide groove, a second support member extending from the first support member to protrude from the terminal mounting board, a head movably coupled to the second support member of the body, and a contact plate mounted on a portion of the head and electrically connected to the power.
